

PMIC PCA9460 FOR i.MX 8ULP

PCA9460 is the power management IC (PMIC) designed to support i.MX 8ULP processor. Three model numbers are available depending on the type of DRAM supported, as shown in the table below. Power supply can support peripherals as well as i.MX 8ULP.

We recommend PCA9460 when using i.MX 8ULP for design simplification of power supply.
