

Statement on California Proposition 65

California Proposition 65, the California Safe Drinking Water and Toxic Enforcement Act of 1986, is intended to protect drinking water sources from chemicals known to cause cancer, birth defects or other reproductive harm, and to inform citizens about possible exposures to such chemicals.

NXP has reviewed and considered the substance list of the California Proposition 65 regulation. Having reevaluated supplier certifications and material composition declarations, NXP has determined, to the best of its knowledge and belief, that:

- NXP products may contain one or more of the substances registered on this substance list. Information regarding substances contained may be found in NXP product composition declarations.
- NXP products are not intended to cause consumer exposure to any contained substances during normal product use.

To facilitate customer requirements on California Proposition 65 regulation and to inform the public in general, NXP makes product composition declarations for its products available via the internet at:

<http://www.nxp.com/about/corporate-responsibility/environmental-compliance-organization/product-content-search:ENV-PRODUCT-COMPOSITION>

The above statements are valid and accurate to the best of our knowledge for products in original condition as shipped from our factories, including but not limited to the referenced product composition declarations.
